

## website

Home - Women - men - Kid - Customer

My website will have 5 Pages.

1)

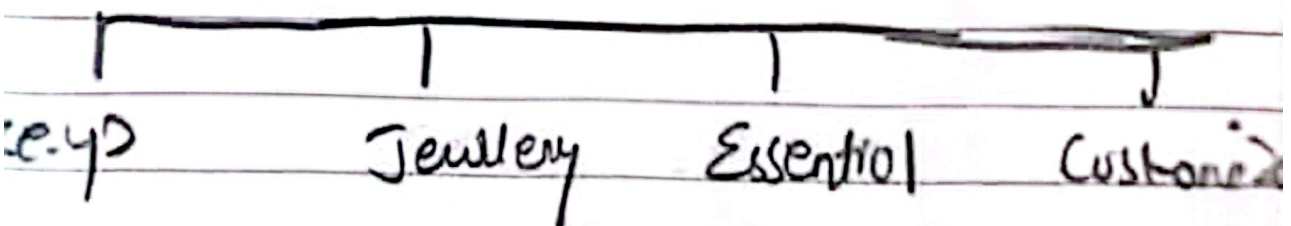

Home  
Header → Linking Pages

little discription

Footer

2)

Women

Women will have 5 Main  
sub section which will have  
more sub section

5 Hair, Skin - Care

⑥

will fetch data in frontend.

Library we will use

1) shadow 2) react-icon.

Note

Shipping

I will use courier service just like tcs, leopart etc as we already have account in a service. They also provide tracking id so I do not have to use shipment API.

Payment

I will provide cod Payment and for make to order thing I will communicate on what-y

Date

(3)
